ODIHR's Key Observation

ODIHR recognizes Croatia's efforts to improve hate crime recording and data collection, and welcomes the recently updated inter-agency Protocol for Procedure in Cases of Hate Crimes. However, based on the available information, it observes that Croatia's hate crime recording and statistics do not sufficiently distinguish hate crimes from other crimes. In addition, ODIHR observes that Croatia would benefit from raising awareness among and building the capacity of criminal justice officials to address hate crime.

Official Data

Data recorded by the police may include criminal offences of incitement to hatred, which fall outside of the OSCE definition of hate crime. Data on prosecuted cases represents 125 criminal offences, of which 48 indictments were filed for 57 offences.
