1 2023

Summary

Austria regularly reports hate crime data to ODIHR. Implemented in 2021, Austria's new hate crime recording system represents a good practice in the region. The Austrian Ministry of the Interior is also a member of the civil society network "Hate Crime Kontern", which strengthens hate crime co-ordination and victim support, and cooperates directly with civil society organizations. Hate crime statistics collected by the Ministry are [published online](#) each year.

In January 2023, Austria implemented ODIHR's [Diagnostic Workshop](#) to Assess National Structures and Services for Hate Crime Victim Support.

ODIHR's Key Observation

ODIHR recognizes Austria's long-term efforts to improve its hate crime recording and data collection mechanism as well as its hate crime victim support system. ODIHR observes that Austria would benefit from raising awareness among and building the capacity of criminal justice officials, including prosecutors and judges, to address hate crimes.

Official Data

Police records represent the number of offences recorded as hate crimes; a total number of 5,668 cases were registered, some of which involved more than one bias motivation. Police-recorded hate crimes include offences that fall outside of the OSCE definition of hate crime. These include cases defined as "right-wing extremism" under the Prohibition Act, insults, and honour crimes. Prosecution and sentencing figures are based on the same recording methodology as police-recorded figures. Prosecution figures exclude 1,748 cases prosecuted under the Prohibition Act (§§ 3a-3h VerbotsG) and 259 cases of honour crimes (§§ 111, 113, 115, and 116 StGB). Sentencing figures exclude 123 cases sentenced under the Prohibition Act (§§ 3a-3h VerbotsG) and 23 cases of honour crimes (§§ 111, 113, 115, and 116 StGB). All the excluded cases fall outside the OSCE definition of hate crime. It is only possible to disaggregate prosecuted hate crime cases by type of crime. Austria's Ministry of Justice is developing categories for recording bias motivations in line with the categorization system used by the Ministry of the Interior. The IT system is expected to be finalized by the end of 2024 and operational in 2025.

Year	Hate crimes recorded by police	Prosecuted	Sentenced
2023	5,668	2,755	246

Police data by bias motivation

The number of police-recorded cases provided in the charts below refer to the number of bias motives and not the number of offences. This is why the numbers below do not match the total number of police-recorded cases in the table above. A total of 4,109 bias motives recorded under the Prohibition Act and those classified as insults were excluded from ODIHR's report, as they fall outside the OSCE hate crime definition.

1,547

Racist and xenophobic hate crime

This category includes hate crimes registered under the categories of bias against "ethnic/national origin" and/or "skin colour". Anti-Roma hate crime are also included under this category.

A further 2,420 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

577

Anti-LGBTI hate crime

This category includes hate crimes based on bias against sexual orientation (498) and hate crimes based on bias against gender identity, although the two categories were reported on separately.

A further 541 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

312

Unspecified

This category includes 136 hate crimes committed with a bias based on social status and 176 hate crimes with a bias based on age. This category might include motives for which the legal basis falls outside the OSCE hate crime definition.

293

Anti-Muslim hate crime

A further 251 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

177

Anti-Semitic hate crime

A further 393 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

162

Anti-Christian hate crime

A further 154 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

138

Gender-based hate crime

This category does not include motives recorded under the category "gender identity."

A further 195 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

Disability hate crime

A further 155 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

Other hate crime based on religion or belief

This category includes motives registered as "Other" within the "religion" category in the Austrian Ministry of Interior's data recording system. A further 62 recorded bias motives were excluded from this category as the legal basis for their recording falls outside the OSCE hate crime definition.

Police data by type of crime

The number of police-recorded cases provided in the charts below refer to the number of bias motives and not the number of offences. This is why the numbers below do not match the total number of police-recorded cases in the table above. A total of 4,109 bias motives recorded under the Prohibition Act and those classified as insults were excluded from ODIHR's report, as they fall outside the OSCE hate crime definition.

This category does not include attempted homicides.

National Developments

In January 2023, ODIHR delivered a Diagnostic Workshop to examine national structures and services to support victims of bias-motivated crime in Austria. Participants included representatives of the Federal Ministry of Justice (FMJ), the Vienna Public Prosecutor's Office, the crime prevention departments of various local police departments and associations such as WEISSER RING, Neustart, ZARA, the anti-discrimination offices of Vienna and Styria and the Jewish Community of Vienna.

This "diagnostic workshop" served to deepen the understanding of national authorities regarding the interaction between law enforcement agencies and victims' organizations in order to ultimately achieve improvements for victims of hate crime at all levels. The two main areas of focus for the working meeting were respectful and sensitive treatment of victims, and the needs assessment and referral of victims of bias-motivated crime. These topics were determined in advance via a detailed analysis of online questionnaires completed by representatives of national authorities.

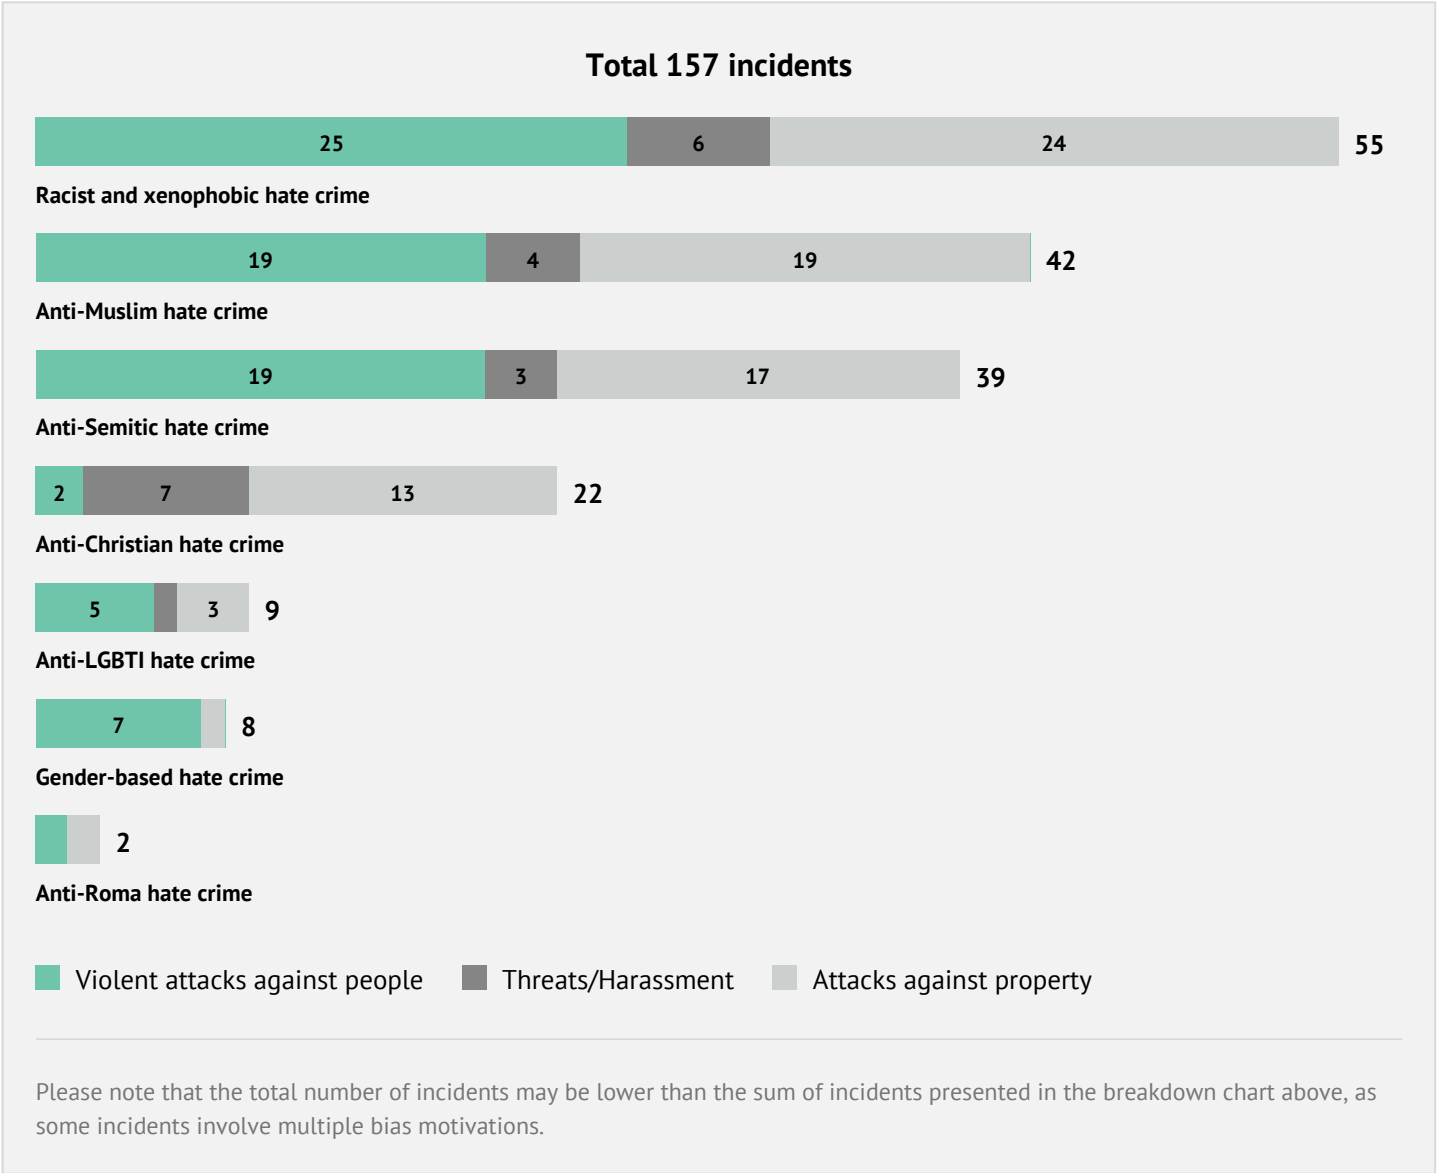

In March 2023, experts from the Austrian and German Ministries of Interior (Mols) and the German task force against hate and hate speech participated in a two-day event to discuss hate crime and online hatred, with a focus on investigation, prosecution, prevention, data collection, training initiatives for the police and judiciary, and co-operation between the state and civil society.

In June 2023, the Mol and FMJ organized a roundtable against hate crimes targeting LGBTIQ+ people in co-operation with representatives of the community in Austria. Following an initial data analysis, the roundtable contributed to developing measures to address hate crimes targeting LGBTIQ+ people. During the roundtable, the Mol presented the results of an exchange with Austria's Office for Crime Prevention and Victim Support of the Federal Criminal Police Office and the Head of the Diversity Unit of the Vienna Police Department. The roundtable led to the inclusion of "trans" as a subcategory of "gender" in the list of available bias motivations in the police flagging programme.

The Mol also organized a two-day workshop in November 2023 (co-funded by the European Commission) on planning and delivering public campaigns on hate crime and hate speech. The workshop was attended by 24 representatives from 15 EU Member States, Norway, the UK, the EU Fundamental Rights Agency, the Council of Europe, the EU Commission and key stakeholders from the research and NGO sectors.

Between October 2023 and October 2025, the Mol is conducting a quantitative and qualitative study of police work with the Austrian Institute for Advanced Studies (IHS), as well as on the analysis of possible preventive measures against hate crime and hate speech, funded by the Austrian Research Promotion Agency (FFG).

Incidents reported by civil society

In addition to incidents submitted with detailed descriptions, this chart includes 18 anti-Semitic incidents reported as statistics by the Jewish Community of Vienna.
